GO400
Game Buyback Series

Game Buyback Series

The fantastic idea with Game Buyback, is that the customers, in an automated kiosk can buy new and used games as well as sell back their used games. There is a minimum of competition from online stores because of the complexity and shipping costs. With a kiosk, it is really convenient! The kiosk can be placed inside and outside of supermarkets, electronic stores and convenience stores. This results in high customer availability at unrivalled low operating cost.

We operate all the underlying technology for you and all kiosks are supplemented with operations service. We will support you through this exciting journey, so you can focus on making profit. Be part of this unique and exciting concept!

GO400 - A unique competitive tool

The customers can via a 17" touch screen choose between 400 games. The kiosk handles Playstation 2, Playstation 3, Xbox and Wii games (all in their original cases). The kiosk has two big back-lighted panels where you easily can change content to increase attractiveness. The system can be customized to meet your business model, e.g. you can let consumers identify themselves before they are allowed to sell a game to the kiosk. You can also decide if you should offer credits or cash, or both!

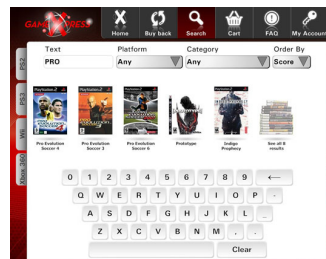

Specifications

- Dimensions: 909 x 813,1 x 1.944,7
- Weight: about 300 kg
- 17" SAW touch screen.
- Handles buyback and purchases of used games.
- Can be equipped with either magnetic stripe or EMV chip & pin.
